Profile

From the moment I produced my first "Hello World" application in the console, I knew I was hooked into the world of development. I thought myself how to code from courses online, being a developer is not just a job to me, it's an offered and engaging challenge to continually learn an improve my skills in creating high-quality apps. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting every day. Below you'll find projects I have completed that showcase my skills and general background in developing apps and websites.

Employment History

Mentor, SideHustle Internships, Remote
October 2020 — December 2020

Served as a facilitator for problem-solving and peaceful resolutions. Mentor other Junior Developers on the Basic of Web Development.

Built a Slack Bot for managing the Large Slack workspace which made the internship flow smoothly.

FrontEnd, BuildForSDG, Remote
August 2020 — October 2020

Lead the Frontend team during Facebook and Andela's Build for SDG Challenge to come up with a web app for the challenge.

https://repify.herokuapp.com/

Slack Bot

Built a Slack Bot that using the slack API and JavaScript to help manage a large Slack workspace of over 4000 interns. The bot promotes interns from one channel to another, and also deactivate those who did not pass their test.

Source Code : https://github.com/AugustBemsen/SlackBot

iNotes

iNotes is a web application built with React.js. Its a simple notes ToDo List app. I built iCook to help me list out things i plan to do for the day so i wont forget them.
